PROGRAM OVERVIEW

History is the study of the written human past and helps in understanding how individuals and societies behave. The study of history encourages students to acquire critical skills, such as the ability to reason, analyze, investigate problems and synthesize diverse information and express ideas or data clearly and precisely. Students receive a broad introduction to the history of the great civilizations of the world and specific areas of historical inquiry. A bachelor’s or graduate level degree is necessary for most history-related careers. The curriculum listed is designed for transfer to four-year institutions.
